

- ✓ Software company - Smart solutions for the satellite industry
- ✓ 35+ years 100% focused & specialized in satcoms
- ✓ Use of Edge technologies . >35% in R&D, 7 Innovation awards
- ✓ Worldwide presence
- ✓ Strategic Partners

REGULATING AND EPFD CALCULATIONS	NETWORK DESIGN & CAPACITY MANAGEMENT				DEPLOYMENT & MAINTENANCE		MONITORING & DETECTION	
TOOL	TOOL	ADD-ON	TOOL	TOOL	TOOL	ADD-ON	TOOL	ADD-ON
<p><b>VeryFiling</b></p> <p>VeryFiling is a user-friendly EPFD calculation software aligned with ITU/FCC standards, for Satellite Operators and Regulators.</p> 	<p><b>Beam Budget</b></p> <p>Links design for an optimal network infrastructure with different scenarios to define the requirements of the future network</p> 	<p><b>BestPath</b></p> <p>Identifies the best connectivity path, with the customer antennas or satellites.</p> 	<p><b>FlexCap</b></p> <p>Manages the pool of capacity dynamically by allocating a different kind of users and agreements.</p> 	<p><b>LEO NMS</b></p> <p>Manage, monitor, qualify &amp; report any provider network in a single screen. Multi-orbit, Multi-vendor.</p> 	<p><b>Satmotion</b></p> <p>Helps the installation team to install a link, certifying communication with NOC</p> 	<p><b>Alusat</b></p> <p>It allows unattended maintenance of the links with the different VSATs on the network.</p> 	<p><b>Controlsat</b></p> <p>Spectrum monitoring, detecting signal degradation, and reporting any anomaly</p> 	<p><b>Vectorsat</b></p> <p>Carrier under Carrier analysis, Constellation monitoring, MER, and distortion measurements</p> 

## NEXT STEPS FOR GROUND SEGMENT

### ❖ Key issues

- High impact of Leo / Meo Architectures
- HTS Satellites

### ❖ Trends

- Solutions for Multiorbit environments
- Embedding of GEO / LEO / MEO technologies
- Merging with terrestrial Telecomms (5G / TETRA / Optical Fiber...)

### ❖ Opportunities

- New features demand new developments
- Emerging markets and use of new technologies (AI...)
